# **Draft Corridor Plan**

## Wairarapa Corridor: Masterton to Upper Hutt

This corridor follows the current state highway 2 from Upper Hutt over the Kaitoke and Rimutaka Hills through to Masterton.

## Identified needs and issues

- Low population growth in the Wairarapa.
- The importance of continued access to employment in Wellington CBD and the Hutt Valley by Wairarapa residents.
- A significant growth in forestry and timber products expected over the next 20 years.
- Increase in the demand for freight transport to the Port.
- Growth in tourism.
- Increases in recreation and shopping journeys.
- Limited passenger rail frequency for commuters, tourism and recreation.
- Limited affordable options to increase the Rimutaka Hill Road capacity.

These needs and issues were used in the analysis process to identify the following short and long term proposals.

## Projects to 2008

### Roading

- Construct improvements on the Kaitoke Hill Road (\$10 million).
- Complete a target 70 kph standard design strategy for the Rimutaka Hill Road, recognising that a lower standard will apply to some difficult terrain sections.
- Complete design and construction of the "Muldoons Corner" section of the Rimutaka Hill Road.
- Maintain continuous improvements on the Rimutaka Hill Road to meet the underlying growth in traffic excluding the demands of forestry and timber products.
- Develop passing lanes on the Featherston-Masterton Road and bring all bridge structures up to required standards, including the early replacement of the Waiohine River bridge.

• Extend the seal on rural local roads of special tourist or forestry significance where cost effective.

#### Rail freight

- Protect and develop rail infrastructure, wagons and facilities for freight and forestry links between Masterton and Wellington by partnerships between commercial interests and service providers.
- Investigate, and if feasible develop a log transfer and storage site at Waingawa as a commercial partnership.

#### Public transport

- Continuous improvement in the quality and accessibility of passenger rail services on the Upper Hutt-Masterton route to meet the needs of commuters, tourists and those engaging in recreation, including the refurbishment or replacement of all substandard passenger carriages.
- Provide connecting bus services as required.

#### **Projects for Beyond 2008**

- Continue to develop the Rimutaka Hill Road to 70 kph standards.
- Develop additional passing lanes on the Featherston-Masterton Road.
- Extend the seal on rural local roads of special tourist or forestry significance where cost effective.
- Investigate, and if feasible, develop a log transfer and storage site near Featherston.
- Upgrade railway stations on the corridor.
- Construct railway stations at Timberlea and Cruickshank Road.
- Continuous improvement in the quality and accessibility of passenger rail services on the Upper Hutt-Masterton route particularly to meet the needs of commuters, tourists and those engaging in recreation.
- Provide connecting bus services as required.
