

**Report**                    **04.78**  
**Date**                      18 February 2004  
**File**                        TP/03/09/01

**Committee**            **Regional Land Transport**  
**Author**                **Tony Brennand Manager Strategic Direction**

## **Presentations on Economic Development, Freight Transport and Network Security**

### **1. Purpose**

To provide the Committee with a series of presentations on economic development, freight transport and network security.

### **2. Background**

The review of the current RLTS will involve the identification of a wide range of issues and the development of solutions to address them. This will involve some research into particular aspects of the role of transport in society and business.

### **3. Comment**

At the meeting there will be presentations on the role of transport in economic development, the role of freight transport and the issue of network security. These presentations will cover issues such as those below and others:

- the makeup and structure of the Wellington regional economy
- the role of transport in the regional economy
- the impact of congestion and transport inefficiency on regional productivity
- the regional productivity response to transport investment
- the patterns of freight movement in the Wellington region
- the issues and constraints associated with freight movement
- the priority investments for the movement of freight
- what do we mean by network security?

- how do we describe network security?
- how do we measure network security?
- the kinds of strategies that could be used to ensure network security
- cost effectiveness and reasonableness of these strategies
- the importance of network security

#### **4. Communications**

There are no relevant communication matters.

#### **5. Recommendations**
