

## Submitter Details

<b>Submitter No.</b>	S73
<b>Submitter Name</b>	Alicia Hall
<b>Date received</b>	14/10/2022
<b>Notes</b>	
<b>Number of uploaded docs</b>	0

## Submission Points

The following table lists all of the submission points made by this submitter. The details of each submission point can be edited by clicking the 'edit' link, editing the information and then clicking 'submit'.

If you can't find the provision by typing the number, try typing a word in the body of the provision. For example, typing 'polic' will bring up all provisions that have the word 'policy' in their name.

If you need to void (delete) a submission point, click the 'edit' link and change the 'Status' field to 'Void'. Once the 'submit' button has been clicked, the submission point will be removed from the table and any reports.

Reporting Topic	Submission Point	Plan section	Provision	Support/Oppose	Reasons	Decision Requested	Mapping	Scope	Scope recom

## Raw uploaded submission points

This table contains raw submission point data that has been uploaded from the Council's online submission form. These submission points need to be transferred into Spoken by adding them as submission points using the 'Add submission point' form below or clicking on 'upload directly'. Once the raw uploaded submission has been added into Spoken, please confirm by selecting 'yes' in the 'uploaded into Spoken' field. Submission points that have not been 'lodged' are able to be edited by the submitter until either they have finalised and lodged their submission or after the submission closing date, so consider not summarising those points early.

Raw sub point	Plan section	Provision	Support/oppose	Decision sought	Reasons	Entered into Spoken	Upload directly
S73.1	General comments	General comments - overall	Support	As a parent and resident of Pōneke Wellington I fully support the proposed Regional Policy Statement.	As above.	No	<a href="#">upload...</a>
				<p>Particularly the provisions recommended for maintaining and strengthening regional emissions reduction target including 50% reduction by 2030 and net zero by 2050 to stay within 1.5 degrees of warming. Maintaining and strengthening the links in the RPS between how we live (urban development) and how we move around (transport) and emissions reduction so that all new projects involved in urban development and transport must show how they will not increase emissions.</p> <p>I would like to see bold leadership on the GWRC to lead the way in making climate friendly policies and solutions through a future proofing lens.</p> <p>Applying a climate lens to every decision made in these areas is crucial and these decisions and choices must be future proofed. Decisions made today impact generations beyond our own and as current leaders in this space, GWRC has a responsibility to ensure decisions made are in line with</p> <p>the science and in the best interest of ALL in our communities.</p>			

I support maintaining the strong provisions on freshwater, including Te Mana o te Wai, Blue Belt and preventing freshwater pollution.

I support Councils being empowered and upskilled in implementing good policy and decision making around intensification and limiting the development of urban sprawl/car dependent neighbourhoods. Greenfield projects must show how they do not add to or increase emissions and how they can contribute to emissions reductions through good planning.

I support GWRC to make decisions and policies that benefit the wellbeing and health of all communities, all people and to enrich and enhance our biodiversity and environment. Being good ancestors for our tamariki.
